ABOUT US

"Long Life Boilers Mfg. Co." was established in 1982, and has a market experience of the years together in designing, manufacturing, marketing, supplying after sales services and enhancement of efficiency in existing heating system. Our Product range primarily includes steam boilers, thermic fluid heaters, hot air generators and full range of custom engineered equipments. Currently we have a supplied no. of units which are running to entire satisfaction of our valued customers.

Special Features

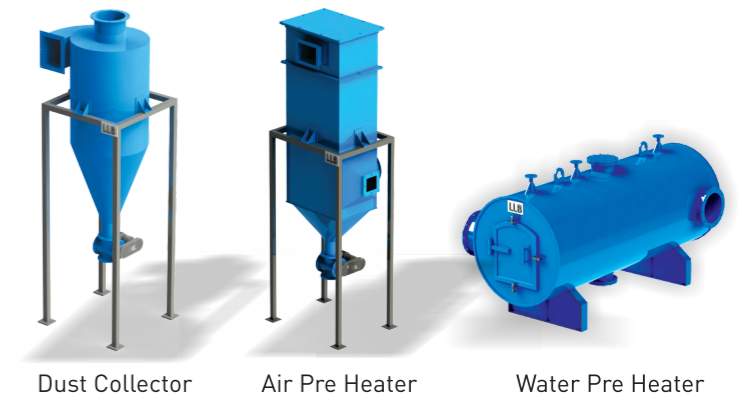

- Compact & Rugged Design
- Large Water and Steam Space
- Better Steam Quality/dryness
- Highly Dependable Due to High Quality Material and Fabrication
- Less Space Requirement.

STEAMPAC

Pollution control by Mechanical dust collector

- Minimizes pollution due to particles re-entertainment in gas stream
- Efficiency extracts dust from the flue gas
- Efficiency can be increases to meet future norms without major structural changes
- Low power consumption of ID Fan
- Robust and wear resistant construction enhanced life of internals. specially suited for agro waste boilers
- Easy removal of dust/ash
- Space saving design

Dust Collector Air Pre Heater Water Pre Heater

OPTIONS TO INCREASE SAVINGS

Water Pre Heater

- Recovers maximum heat from boiler flue gas
- Faster steam generation
- Saving of fuel up to 10-15%
- Easy to maintain
- Also saves fuel

AIR PRE HEATER

- Recovers maximum heat from the boiler flue gas
- Improves combustion of fuel that has higher moisture content
- Easy to maintain
- Saving of fuel up to 15%
- Self-cleaning design for better efficiency
- Hot air helps in better & quick burning

Fuel Flexibility
